Sagem Orga EMV Consulting and the Smart tools help your company determine the true cost of an EMV migration.

With our tools and experience, you can minimize your migration risk and realize a strong return on investment (ROI).

EMV Consultant

Technical consulting for certified personalizers and banks

Our in-depth expertise was deployed by VISA, MasterCard and Europay to help them define their EMV standards. Your organization can benefit from our experience and know-how, too. Sagem Orga has been involved in smart card technology since its beginnings. The milestones in our history show that Sagem Orga has been the leading manufacturer in chip implementation and security.

As a pioneer in the smart card industry, Sagem Orga has worked on the basics of the EMV specifications as a consultant for MasterCard, Europay and VISA.

As a successful smart card manufacturer and smart card integrator we have built up and shared know-how in many certified and approved internal, customer and "certified vendor" projects.

Together with our selected partners, each with special experience relevant to specific product offerings, we offer a total solution to support personalizers in their migration to EMV production of smart bank cards.

Our reference sites are detailed in the enclosed overview. We would be happy to provide any information you would

like to have on the setup of the various references.

Different models have been successfully realized based on different customer-specific needs.

The more Sagem Orga is involved, the more you reduce costs, time and risk in your migration project
